# Adding an Example to your RPA Express

To use an Example, you should add it to your **Media Files**. To do this, follow the steps below:

1. Unzip the sample example.

2. Copy unzipped files into your workspace folder (by default C:\Users\%USER_NAME%\workfusion-workspace\rpae_project).

3. Right-click the **rpa_project** folder in **Media Files** and select **Refresh** (or press **F5**).

4. On finishing these actions, you should see a new project (.rpae file) in your **Media Files**.

5. To run it, just press button "**Play recording**".
